Zepto Product Inventory Analysis

SQL Project (PostgreSQL) | Aditya Kushwaha

Project overview

Analysis of a Zepto quick-commerce product listing (3,732 products across 14 categories) with SQL. The project covers table design, data exploration, data cleaning and ten business questions on pricing, discounts, stock availability, category revenue and value for money. Every query below was run on the dataset and the output shown is the real result.

Tool	PostgreSQL (window functions, CTEs, FILTER, STRING_AGG, CASE)
Dataset	zepto_v2.csv: 3,732 rows, 9 columns (category, name, MRP, discount %, available quantity, selling price, weight, out-of-stock flag, quantity)
Steps	1. Table setup 2. Exploration 3. Cleaning 4. Business analysis

Key findings

• 453 products (12.1%) are out of stock; Biscuits have the highest stock-out rate at 28.6%.
• High-value items such as Patanjali Cow's Ghee (Rs 565) and MamyPoko diapers (Rs 399) are out of stock, a direct loss of high-ticket sales.
• Fruits & Vegetables carry the highest average discount (15.5%), while premium oils and ghee above Rs 500 sell at under 10% off.
• Cooking Essentials and Munchies lead estimated revenue at about Rs 3.37 lakh each.
• Staples such as salt and onions give the best value at about Rs 0.02 per gram.
• Data quality: six category pairs hold identical product lists, and one product had a zero price (removed). Category totals for duplicated pairs should not be added together.

1. Table setup

1.1 Create the table

Creates the table with a surrogate key (sku_id) and correct data types for prices, quantities and the stock flag.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 1.1: Create the table

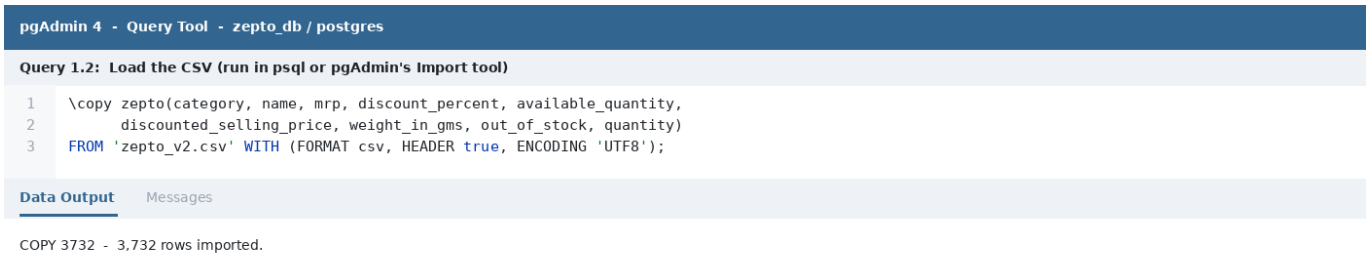

```
1  DROP TABLE IF EXISTS zepto;
2
3  CREATE TABLE zepto (
4      sku_id                  SERIAL PRIMARY KEY,
5      category                VARCHAR(120),
6      name                    VARCHAR(150) NOT NULL,
7      mrp                     NUMERIC(8,2),
8      discount_percent        NUMERIC(5,2),
9      available_quantity      INTEGER,
10     discounted_selling_price NUMERIC(8,2),
11     weight_in_gms           INTEGER,
12     out_of_stock            BOOLEAN,
13     quantity                INTEGER
14 );
```

Data Output | Messages

CREATE TABLE - Query returned successfully.

1.2 Load the CSV (run in psql or pgAdmin's Import tool)

Loads the 3,732-row CSV into the table.

2. Data exploration

2.1 Total number of rows

Confirms the row count after loading.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.1: Total number of rows

```
1  SELECT COUNT(*) AS total_rows
2  FROM zepto;
```

Data Output | Messages

	total_rows
1	3732

Total rows: 1 Query complete

Result: 3,732 rows loaded, matching the source file.

2.2 Sample of 10 rows

Previews the data to check columns and units.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.2: Sample of 10 rows

```
1  SELECT *
2  FROM zepto
3  LIMIT 10;
```

Data Output | Messages

	sku_id	category	name	mrp	discount_percent	available_quantity	discounted_selling_price	weight_in_gms	out_of_stock	quantity
1	1	Fruits & Vegetabl…	Onion	2500.00	16.00	3	2100.00	1000	false	1
2	2	Fruits & Vegetabl…	Tomato Hybrid	4200.00	16.00	3	3500.00	1000	false	1
3	3	Fruits & Vegetabl…	Tender Coconut	5100.00	15.00	3	4300.00	58	false	1
4	4	Fruits & Vegetabl…	Coriander Leav…	2000.00	15.00	3	1700.00	100	false	100
5	5	Fruits & Vegetabl…	Ladies Finger	1400.00	14.00	3	1200.00	250	false	250
6	6	Fruits & Vegetabl…	Potato	3500.00	17.00	3	2900.00	1000	false	1
7	7	Fruits & Vegetabl…	Lemon	7500.00	16.00	3	6300.00	200	false	200
8	8	Fruits & Vegetabl…	Watermelon	5800.00	15.00	3	4900.00	58	false	1
9	9	Fruits & Vegetabl…	Capsicum Green	2300.00	17.00	3	1900.00	250	false	250
10	10	Fruits & Vegetabl…	Chilli Green	1900.00	15.00	3	1600.00	100	false	100

Total rows: 10 Query complete

Result: Prices are stored in paise (Onion MRP = 2500), so they need conversion to rupees.

2.3 Check every column for missing values

Counts missing values in every column using COUNT(*) FILTER.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.3: Check every column for missing values

```
1  SELECT
2      COUNT(*) FILTER (WHERE category IS NULL)                AS null_category,
3      COUNT(*) FILTER (WHERE name IS NULL)                    AS null_name,
4      COUNT(*) FILTER (WHERE mrp IS NULL)                     AS null_mrp,
5      COUNT(*) FILTER (WHERE discount_percent IS NULL)        AS null_discount,
6      COUNT(*) FILTER (WHERE available_quantity IS NULL)      AS null_avail_qty,
7      COUNT(*) FILTER (WHERE discounted_selling_price IS NULL) AS null_selling_price,
8      COUNT(*) FILTER (WHERE weight_in_gms IS NULL)           AS null_weight,
9      COUNT(*) FILTER (WHERE out_of_stock IS NULL)            AS null_stock_flag,
10     COUNT(*) FILTER (WHERE quantity IS NULL)                AS null_quantity
11 FROM zepto;
```

Data Output | Messages

	null_category	null_name	null_mrp	null_discount	null_avail_qty	null_selling_price	null_weight	null_stock_flag	null_quantity
1	0	0	0	0	0	0	0	0	0

Total rows: 1 Query complete

Result: No missing values in any column.

2.4 List of product categories with product count

Shows the 14 product categories and how many products each holds.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.4: List of product categories with product count

```sql
SELECT category,
       COUNT(*) AS products
FROM zepto
GROUP BY category
ORDER BY products DESC;
```

Data Output | Messages

	category	products
1	Munchies	514
2	Cooking Essentials	514
3	Packaged Food	388
4	Chocolates & Candies	388
5	Ice Cream & Desserts	388
6	Paan Corner	344
7	Personal Care	344
8	Home & Cleaning	194
9	Biscuits	147
10	Beverages	129
11	Dairy, Bread & Batter	129
12	Health & Hygiene	97
13	Fruits & Vegetables	93
14	Meats, Fish & Eggs	63

Total rows: 14 Query complete

Result: Munchies and Cooking Essentials are the largest categories with 514 products each.

2.5 In-stock vs out-of-stock products

Splits products into in stock and out of stock, with a window function for the share.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.5: In-stock vs out-of-stock products

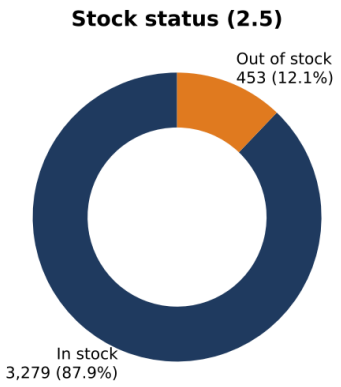

```sql
SELECT CASE WHEN out_of_stock THEN 'Out of stock' ELSE 'In stock' END AS stock_status,
       COUNT(*) AS products,
       ROUND(100.0 * COUNT(*) / SUM(COUNT(*)) OVER (), 1) AS share_pct
FROM zepto
GROUP BY out_of_stock;
```

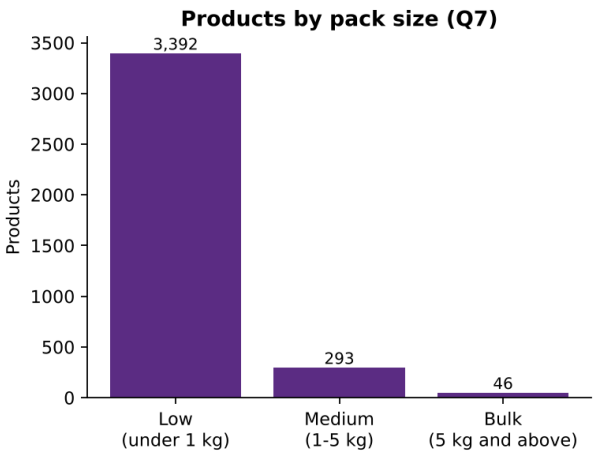

Data Output | Messages

	stock_status	products	share_pct
1	In stock	3279	87.9
2	Out of stock	453	12.1

Total rows: 2 Query complete

Result: 453 products (12.1%) are out of stock.

2.6 Product names that appear more than once (multiple pack sizes / SKUs)

Finds product names listed more than once, usually different pack sizes.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.6: Product names that appear more than once (multiple pack sizes / SKUs)

```sql
SELECT name,
       COUNT(*) AS sku_count
FROM zepto
GROUP BY name
HAVING COUNT(*) > 1
ORDER BY sku_count DESC
LIMIT 10;
```

Data Output | Messages

	name	sku_count
1	Arden Eggs White	10
2	Amul Delicious Fat Spread - Cholesterol Free	10
3	Quaker Oats	10
4	Mother's Recipe Tamarind Paste	10
5	Saffola Veggie Twist Masala Oats	10
6	Sunfeast Yippee! Pasta Treat - Sour Cream Oni…	10
7	Kellogg's Real Almond & Honey Corn Flakes	9
8	Amul Fresh Cream	8
9	iD Idli & Dosa Batter	7
10	Prasuma Vegetable Momos	6

Total rows: 10 Query complete

Result: Popular items such as Quaker Oats appear as up to 10 separate SKUs.

2.7 Data quality check: categories that hold the exact same product list

Builds a "product list signature" per category with STRING_AGG and self-joins to find categories that are exact copies.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 2.7: Data quality check: categories that hold the exact same product list

```sql
WITH category_signature AS (
    SELECT category,
           STRING_AGG(name || '|' || mrp::TEXT || '|' || weight_in_gms::TEXT, ','
                      ORDER BY name, mrp, weight_in_gms) AS product_list
    FROM zepto
    GROUP BY category
)
SELECT a.category AS category_1,
       b.category AS category_2
FROM category_signature a
JOIN category_signature b
  ON a.product_list = b.product_list
 AND a.category < b.category
ORDER BY category_1;
```

Data Output | Messages

	category_1	category_2
1	Beverages	Dairy, Bread & Batter
2	Chocolates & Candies	Packaged Food
3	Chocolates & Candies	Ice Cream & Desserts
4	Cooking Essentials	Munchies
5	Ice Cream & Desserts	Packaged Food
6	Paan Corner	Personal Care

Total rows: 6 Query complete

Result: Six category pairs hold identical product lists (for example, Munchies = Cooking Essentials). Category-level totals for these pairs are duplicated, so results by category should be read with this in mind.

3. Data cleaning

3.1 Find rows with zero MRP or zero selling price

Looks for products with a zero MRP or selling price, which are invalid.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 3.1: Find rows with zero MRP or zero selling price

```
1  SELECT sku_id, category, name, mrp, discounted_selling_price
2  FROM zepto
3  WHERE mrp = 0 OR discounted_selling_price = 0;
```

Data Output | Messages

	sku_id	category	name	mrp	discounted_selling_price
1	3607	Home & Cleaning	Cherry Blossom Liquid Shoe Polish Neutr…	0.00	0.00

Total rows: 1 Query complete

Result: One product has a zero price.

3.2 Remove rows with zero MRP (invalid prices)

Deletes the invalid zero-price row.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 3.2: Remove rows with zero MRP (invalid prices)

```
1  DELETE FROM zepto
2  WHERE mrp = 0;
```

Data Output | Messages

Query returned successfully. Rows affected: 1

Result: 1 row removed; 3,731 rows remain.

3.3 Convert prices from paise to rupees

Converts MRP and selling price from paise to rupees.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 3.3: Convert prices from paise to rupees

```
1  UPDATE zepto
2  SET mrp                    = mrp / 100.0,
3      discounted_selling_price = discounted_selling_price / 100.0;
```

Data Output | Messages

Query returned successfully. Rows affected: 3731

Result: 3,731 rows updated.

3.4 Check prices after conversion

Checks the converted prices.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 3.4: Check prices after conversion

```
1  SELECT name, mrp, discounted_selling_price
2  FROM zepto
3  LIMIT 5;
```

Data Output | Messages

	name	mrp	discounted_selling_price
1	RRO Burrata Cheese	250.00	125.00
2	MTR Dal Fry	110.00	110.00
3	Neutrogena Deep Clean Foaming Cleanser	130.00	115.00
4	Johnson's Baby Oil	200.00	200.00
5	Om Bhakti Wick for Diya - Ghee Cotton Wicks B…	189.00	170.00

Total rows: 5 Query complete

Result: Prices now read in rupees (for example, MRP Rs 35, selling price Rs 34).

4. Business analysis

4.1 Q1. Top 10 products by discount percentage

Which products carry the deepest discounts?

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.1: Q1. Top 10 products by discount percentage

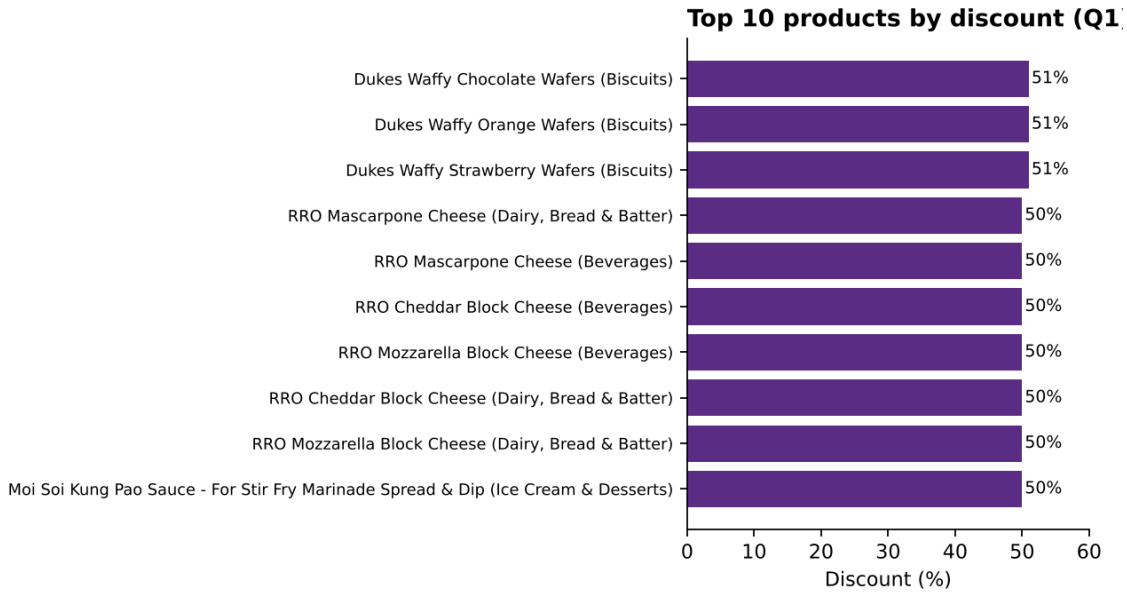

```
1  SELECT DISTINCT name, category, mrp, discounted_selling_price, discount_percent
2  FROM zepto
3  ORDER BY discount_percent DESC, mrp DESC
4  LIMIT 10;
```

Data Output | Messages

	name	category	mrp	discounted_selling_price	discount_percent
1	Dukes Waffy Chocolate Wafers	Biscuits	45.00	22.00	51.00
2	Dukes Waffy Orange Wafers	Biscuits	45.00	22.00	51.00
3	Dukes Waffy Strawberry Wafers	Biscuits	45.00	22.00	51.00
4	RRO Mascarpone Cheese	Dairy, Bread & Batter	355.00	177.00	50.00
5	RRO Mascarpone Cheese	Beverages	355.00	177.00	50.00
6	RRO Cheddar Block Cheese	Beverages	295.00	147.00	50.00
7	RRO Mozzarella Block Cheese	Beverages	295.00	147.00	50.00
8	RRO Cheddar Block Cheese	Dairy, Bread & Batter	295.00	147.00	50.00
9	RRO Mozzarella Block Cheese	Dairy, Bread & Batter	295.00	147.00	50.00
10	Moi Soi Kung Pao Sauce - For Stir Fry Marinade …	Ice Cream & Desserts	280.00	140.00	50.00

Total rows: 10 Query complete

Result: Dukes Waffy wafers lead at 51% off; RRO cheeses follow at 50%.

4.2 Q2. High-MRP products (above Rs 300) that are out of stock

Which high-value products (MRP above Rs 300) are out of stock?

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.2: Q2. High-MRP products (above Rs 300) that are out of stock

```
1  SELECT DISTINCT name, category, mrp
2  FROM zepto
3  WHERE out_of_stock = TRUE
4    AND mrp > 300
5  ORDER BY mrp DESC;
```

Data Output | Messages

	name	category	mrp

7	Everest Kashmiri Lal Chilli Powder	Munchies	310.00
8	Everest Kashmiri Lal Chilli Powder	Cooking Essentials	310.00

Total rows: 8 Query complete

Result: Patanjali Cow's Ghee (Rs 565) and MamyPoko diapers (Rs 399) are out of stock, a direct revenue loss on high-ticket items.

4.3 Q3. Estimated revenue by category (selling price x available quantity)

Estimated revenue per category = selling price x available quantity.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.3: Q3. Estimated revenue by category (selling price x available quantity)

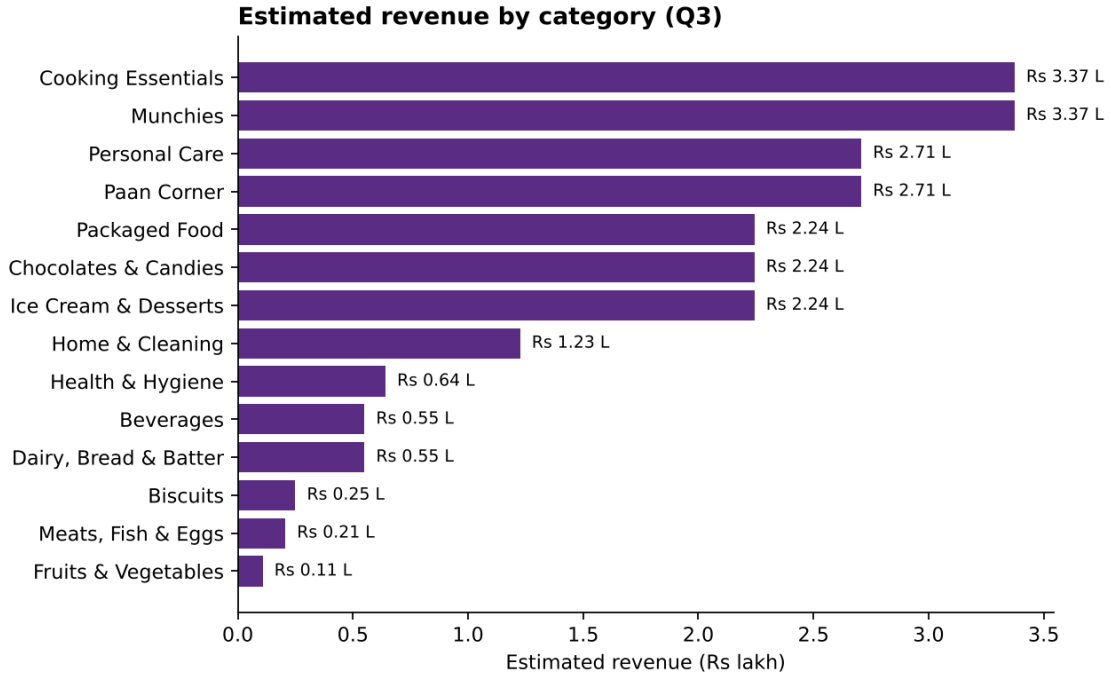

```
1  SELECT category,
2         SUM(discounted_selling_price * available_quantity) AS estimated_revenue
3  FROM zepto
4  GROUP BY category
5  ORDER BY estimated_revenue DESC;
```

Data Output | Messages

12	Biscuits	25007.60
13	Meats, Fish & Eggs	20693.00
14	Fruits & Vegetables	10846.00

Total rows: 14 Query complete

Result: Cooking Essentials / Munchies lead at about Rs 3.37 lakh each; Fruits & Vegetables is lowest at about Rs 10,800.

4.4 Q4. Products with MRP above Rs 500 and discount below 10%

Premium products (MRP above Rs 500) with less than 10% discount.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.4: Q4. Products with MRP above Rs 500 and discount below 10%

```
1  SELECT DISTINCT name, category, mrp, discount_percent
2  FROM zepto
3  WHERE mrp > 500
4    AND discount_percent < 10
5  ORDER BY mrp DESC, discount_percent DESC;

4.7 Q7. Products grouped by pack size: Low, Medium, Bulk

Groups products by pack size with a CASE expression.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.7: Q7. Products grouped by pack size: Low, Medium, Bulk

```sql
SELECT CASE
           WHEN weight_in_gms < 1000 THEN 'Low (under 1 kg)'
           WHEN weight_in_gms < 5000 THEN 'Medium (1-5 kg)'
           ELSE 'Bulk (5 kg and above)'
       END AS weight_category,
       COUNT(*) AS products
FROM zepto
GROUP BY weight_category
ORDER BY products DESC;
```

Data Output | Messages

	weight_category	products
1	Low (under 1 kg)	3392
2	Medium (1-5 kg)	293
3	Bulk (5 kg and above)	46

Total rows: 3 Query complete

Result: 91% of products are small packs under 1 kg; only 46 are bulk packs of 5 kg or more.

4.8 Q8. Total inventory weight per category (in kg)

Total stock weight per category (weight x available quantity).

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.8: Q8. Total inventory weight per category (in kg)

```sql
SELECT category,
       ROUND(SUM(weight_in_gms * available_quantity) / 1000.0, 1) AS total_weight_kg
FROM zepto
GROUP BY category
ORDER BY total_weight_kg DESC;
```

Data Output | Messages

	category	total_weight_kg
1	Munchies	1404.7
2	Cooking Essentials	1404.7

Total rows: 14 Query complete

Result: Biscuits have the highest stock-out rate at 28.6%, more than double the overall 12.1%.

4.10 Q10. Rank products by MRP within each category (top 2 per category)

Ranks products by MRP within each category using DENSE_RANK and keeps the top 2.

pgAdmin 4 - Query Tool - zepto_db / postgres

Query 4.10: Q10. Rank products by MRP within each category (top 2 per category)

```sql
SELECT category, name, mrp, price_rank
FROM (
    SELECT category, name, mrp,
           DENSE_RANK() OVER (PARTITION BY category ORDER BY mrp DESC) AS price_rank
    FROM (SELECT DISTINCT category, name, mrp FROM zepto) AS d
) AS ranked
WHERE price_rank <= 2
ORDER BY category, price_rank;
```

15	Fruits & Vegetables	Apple Washington	177.00	2

Total rows: 39 (showing first 15) Query complete

Result: Shows the most premium products in each category; ties share the same rank.

Conclusion

The analysis points to three actions for the business: restock high-value and fast-selling items (starting with Biscuits, where more than one in four products is unavailable), review discount depth on premium staples that already sell near MRP, and fix the category mapping so that products are not listed under several unrelated categories, which inflates category-level reporting.
